Do you think you know a lot about our solar system and the universe? Test your knowledge with this fun and challenging quiz. See how many questions you can answer correctly, and learn some new facts along the way.

Questions

1. What is the name of the largest planet in our solar system?

2. What is the hottest planet in our solar system?
3. What is the coldest planet in our solar system?
4. What is the only planet in our solar system that has life?
5. What is the name of the largest moon in our solar system?
6. What is the name of the brightest star in our night sky?
7. What is the name of the galaxy that our solar system is located in?
8. What is the name of the supermassive black hole at the center of our galaxy?
9. What is the name of the largest known structure in the universe?
10. What is the name of the theory that explains how the universe began?

Answers

1. Jupiter
2. Venus
3. Neptune
4. Earth
5. Ganymede
6. Sirius
7. Milky Way
8. Sagittarius A*
9. The Great Wall
10. The Big Bang

How Did You Do?

If you answered 8 or more questions correctly, you're a solar system and universe expert! If you answered 5-7 questions correctly, you're on the right track. If you answered 4 or less questions correctly, you need to brush up on your astronomy knowledge.

No matter how you did, we hope you learned something new from this quiz. The solar system and the universe are vast and amazing places, and there's always more to learn.
